Terms and Policy Statement

TI has become a world class company by building on a solid foundation of strong ethical principles and values. Our values of integrity, innovation and commitment have historically led us do things the right way. Additionally, our Worldwide Procurement & Logistics (WPL) organization has adopted the Ethical Principles of the Institute of Supply Management. These same values provide the firm foundation for our success in supplier relationships.

Ethics and integrity are the primary considerations in all actions and decisions. To accomplish this, every Tier and supplier must together foster an environment of fair and impartial opportunities for all suppliers to compete. In such an environment, unethical behavior simply has no place. Also, in the supplier, we will make a definite promise not to be in the position in which a former TI employee and the present TI employee affect dealings with the management and TI.

We count on our suppliers to help us maintain our high standards and promote an environment of healthy and fair competition. If you have any questions or concerns, please contact TI buyer or WPL representative - with whom you feel the most comfortable.
